

Grease Trap Cleaning and Disposal

RILTA Environmental Limited offers a professional cost effective solution for efficient servicing of your Grease trap.

We service Passive Trap/ Interceptors and under-sink units.

With the introduction of new environmental laws, Grease Traps and Grease Interceptors have become an integral requirement of drainage systems for any premises involved in the food sector.

Waste fats, oils and greases (FOG) from food service establishments cannot be treated in the waste-water system and must be kept out of sewers.

To prevent grease entering the sewers it is recommended that food industries use a permitted waste collector such as Rilta Environmental Ltd to remove waste grease before it gets a chance to enter system.

Rilta Environmental Ltd offer a fully traceable "cradle to grave" service furnishing a certificate of authorised disposal on completion of the disposal process.

For more information please call us on +353 1 401 8000

RILTA Environmental Limited is fully ISO 9001, 14001 & OHSAS 18001 certified and licensed under EPA Licence No. W0192-03.

It is the aim of RILTA Environmental Limited to provide an informed and immediate response to all environmental issues.
